Nobile is a medium size bull with very good productive traits. As expected, being son of Fred and having Delano as grandfather, he gives high growing rates to his progeny, but also a very good muscularity. **Nobile's** birth ease is slightly better than the average so he can be used without problems on adult cows from the third calving or on cows at the second calving but with a good calving ease attitude. His daughters are definitely to be bred for the replacement and we expect a good calving attitude from them. **Nobile** can be considered a double line bull good for the productoin of slaughter animals but even more for breeding heifers. His main limit is the parentage with two very important lines: Zaino and Delano. Several matings have to avoided for the inbreeding: progeny of Zaino (daughters of Laser, Inno, Ibrido, Grifone etc..), daughters of Israele, Limbo, Liverpul and of the other Delano's sons.
