The Genetically TENDER Beef Breed

Piedmontese

Opportunity Calls

Looking For Piedmontese

The Piedmontese breed is very rare with less than 300,000 head in existence globally and about 12,000 head in North America today. They evolved in only one very tiny area of the world in north-west Italy and only a very few animals were ever exported out of that country into North America as live animal imports. A total of 6 females and 9 bulls (15 head) were brought here to make the genetic foundation of the herd. By the 1990s the import of semen from Italy was possible and there is now a wealth of bloodlines to select from. The Piedmontese is the only breed in the world known to carry the inactive myostatin gene variant C313Y in a homozygous state (2 copies of the gene). USDA research has confirmed that this unique gene C313Y improves carcass performance (muscle), reduces fat and greatly improves beef tenderness. When you cross a 2-copy Piedmontese animal with a 0-copy (any other breed of cattle) the resulting calf will always carry 1-copy of the C313Y gene. These 1-copy animals also have the dramatically improved tenderness and carcass traits.

The successful branded beef company Certified Piedmontese is based on this unique gene - with crossbred heterozygous (1-copy) slaughter animals being their main product line. All Fullblood and Naturalean Piedmontese that are registered with NAPA are DNA test confirmed to be homozygous (2-copy) for this special gene.

Every bull in the annual Piedmontese Classic Sale is fully registered with the Association and verified by DNA to be homozygous (2-copy) for the gene C313Y.

The North American Piedmontese Association (NAPA) was formed in 2000 to serve breeders across all of North America and to drive breed improvement programs.

Today, NAPA is the largest registry for the breed on the continent - and the second largest in the world, after the original Italian Association ANABORAPI.

NAPA was the first ever cattle association to base animal registration requirements on a specific gene - making it mandatory to DNA test and verify the genetics prior to registration. NAPA launched the first Piedmontese Bull Performance Tests for the breed on this continent in 2007 - with annual tests organized every year since then.

Having a centralized bull test has been a large part of the Association's drive toward breed improvement.

With the combination of accurate pedigree and genetic information in the registry combined with professional performance evaluations, NAPA was then able to launch the EPD Project, and are now producing the first ever breed-specific EPDs for Piedmontese in North America. The NAPA custom EPDs are the ONLY genetic evaluations that take into account the profound effect of a gene (C313Y myostatin) on multiple different traits, like calving ease and birth wt. In fact, we calculate a CE and BW EPD for Piedmontese to Piedmontese matings, and a separate CE1C and BW1C EPD for that animal mated to a non-Piedmontese because 2-copy calves are significantly different than 1-copy calves!

Many breeders have made good use of these improvement programs and are seeing immediate results in their herds.

The Piedmontese is a terminal cross breed. If you are looking ahead, looking for beef yield, profit, and consistent beef tenderness you are looking for the Piedmontese breed.

Visit www.piedmontese.org for further information.

Piedmontese CLASSIC Consignment SALE

We are pleased to invite you to the 2025 NAPA Classic Piedmontese Bull Sale on April 26, to be held at Burwell Livestock Auction in Burwell, Nebraska.

The Sale Committee has worked diligently to compile a wide selection of quality consigned seedstock and commercial bulls to offer.

All yearling bulls have been through the GrowSafe Performance Test so have full professional performance records for gain, feed-efficiency; all bulls have been professionally scored for feet/legs, disposition and movement; all bulls have passed a breeding soundness exam and all older bulls are virgin with negative Trich-tests. Breed-specific EPDs are as complete as possible based on registered pedigree and performance records. All bulls are DNA parentage-verified & confirmed 2-copy.

These bulls will be available for pre-viewing by appointment only at Toro Ranch, Broken Bow, NE. up until April 23, 2025. Call or text Marlin at 605-939-9574 to make an appointment.

For further information, please contact anyone on the Sale Committee:

Tom Sperling - NAPA President

cell (call or text) 605-999-3279

In Broken Bow, NE

Cobblestone Inn:308.767.2060

Boarders Inn & Suites: 308-872-6428

Schedule of Events

Saturday, April 26

- morning inspect sale bulls at Burwell facilities
- Certified Piedmontese Beef lunch in the cafeteria from 11:30 am to 1:00 pm
- 1:00 pm Classic Bull Sale

Note: the Piedmontese Classic BULL SALE will be held at:

Burwell Livestock

401 11th Ave,

Burwell, Nebraska 68823

Again this year, we are offering the “special price” of \$14/unit Semen PRE-ORDER Purchase Agreement available **prior to the sale** on select young herdsires. See the sale terms and conditions at the back of this catalog for further details. You must be physically present at the sale to preorder semen. Proceeds go to the bull buyer.

Bulls are cataloged with “Semen Bulls” first, then in order of age-group from older bulls to yearlings. Bulls may not necessarily sell by catalog order.

It is unethical for anyone to promote, advertise or arrange the sale of any Piedmontese bulls, other than those in the sale, on the sale premises during this event. Complaints about any Soliciting must be made in writing to the NAPA Board of Directors and clearly state the name of person(s) soliciting and to whom they were soliciting (if their identity is known to the complainant).

HOW TO READ THIS CATALOG:

1. Lot number
2. Visual Tag ID: the bull's current ear tag ID
3. Bull's registered name
4. Producer Tattoo: the bulls's permanent ID mark & where he was raised.
5. Registration Number: prefix ET means Embryo Transplant; prefix P = Polled; prefix PS - Poll/Scurs; Prefix N = Naturalean Piedmontese Herdbook
6. Yearling GrowSafe Test data: 205-day adjusted weight, 365-day adjusted weight; Test ADG = Test Average Daily Gain, in pounds/day; RFI = Residual Feed Intake/ Feed Efficiency (a lower number is better); F/G = feed to gain; GDA = Gain Per Day of Age
7. Scores: BW = actual birth weight not adjusted for age of dam; CE = Calving Ease as reported by the breeder (1 is unassisted); Disp = Disposition - scored from 1 to 6 with 1 being extremely calm and 6 being wild; Move. = Movement - scored from 1 to 6 with 1 being extremely free-moving and 6 being extremely short-strided and stiff. A full score of 2 to 4 is considered normal range of motion; REA = Ribeye Area - **unadjusted** ribeye area as measured by **ultrasound on Feb.13, 2025 when most bulls were only 10 months old**; expressed in square inches; SC = Scrotal Circumference in cm at breeding soundness evaluation March 12, 2025 (Note - some bulls are just 12 months old, some are 2 years old)
8. EPDs: Expected Progeny Differences - derived from the bull's own performance data plus all registered animals in his pedigree. See following page for EPD Trait definitions.
9. Birth Date and Piedmontese Breed % - Fullblood are always 100%, Naturalean may be 100% or less
10. Added Info /Genetic Tests: If genetic tests for Color or Polled were conducted, it will be marked; Milk Protein results for A2-A2 will be noted if tested; BCHF Heart-Risk results will be noted if tested (scores are 1 to 10 with a lower number being better)
11. Registered Pedigree
12. Consignor with phone contact.

Reference Sires

These bulls have numerous sons / grandsons in the sale offering. Above (as the example bull) is Dakota Honor 195H with his **yearling** EPDs. Bulls below show current EPDs.

TY Black River 221J

DNA test verified Homozygous Black, Homozygous Polled & Homozygous for C313Y Myostatin. Moderate frame, extra length, gentle disposition. As of Jan 1/25, he had 56 reg 2-copy offspring bred in seven different herds.

	CE	BW	WG	YG	FG	SC

LVC Unlimited 862F

An EPD Trait Leader for Weaning Gain, Yearling Gain and Scrotal Size. Noted for his smooth muscle pattern and extra volume.

	CE	BW	WG	YG	FG	SC
EPD	-1.6	2.6	39.3	92.7	-0.27	0.96
Acc	86	96	80	80	83	87
RANK	41	18	87	94	77	89

As of Jan 1/25, he had 140 reg 2-copy offspring bred in ten different herds.

EPD Descriptions

EPD (Expected Progeny Difference): is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus, with the minus symbol (-) indicating lower than breed average.

ACC (Accuracy): is the reliability that can be placed on an EPD. An accuracy of closer to 99 indicates higher reliability. Accuracy is affected by the number of progeny with records in the pedigree; the more animals in the pedigree that have records in the database, the higher the accuracy will be.

RANK: based on percentages, this indicates where an animal's EPD ranks them in the entire population of the breed. The higher the rank, the better the animal is in the breed for that trait.

CE (Calving Ease Direct): is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease. CE data is from Piedmontese to Piedmontese matings. (EPD CE1C is for Piedmontese mated to a non-Piedmontese animal)

BW (Birth Weight): expressed in pounds, is a predictor of a sire or dams ability to transmit birth weight to their 2-copy progeny compared to that of other animals in our breed. A BW EPD of 4.5 means that average offspring will be 4.5 pounds heavier at birth than breed average; BW EPD of -3.5 means the average calf will be 3.5 lighter at birth.

WG or WW (Weaning Weight): expressed in pounds, is a predictor of a sire or dams ability to transmit weaning growth to their progeny compared to that of other animals in our breed.

YG or YW (Yearling Weight): expressed in pounds, is a predictor of a sire or dams ability to transmit yearling growth to their progeny compared to that of other animals in our breed.

H HT (Hip Height): expressed in inches, is a predictor of the difference in mature height (frame score) of a sires or dams progeny compared to the progeny of other animals in our breed.

REA (Ribeye Area): expressed in square inches, is a predictor of the difference in ribeye area of a sires or dams progeny compared to the progeny of other animals in our breed.

FG (Feed to Gain): expressed in pounds of dry matter (feed), is the predication of the amount of feed it takes to produce a pound of gain in a sires or dams progeny in our breed. A lower number indicates improved feed efficiency.

FI (Feed Intake): expressed in pounds of dry matter (feed) per day, is the predictor of a sires or dams ability to transmit feed intake during the postweaning phase to their progeny compared to that of other animals in our breed. A lower number indicates less feed is consumed.

SC (Scrotal Circumference): expressed in centimeters, is a predictor of a sires or dams ability to transmit scrotal size compared to other animals in our breed.

BW 1C (Birth Weight 1-copy): expressed in pounds, is a predictor of birth weight in 1-copy crossbred calves from non-Piedmontese (non-myostatin-carrier) females.

CE 1C (Calving Ease 1-copy): expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease, in 1-copy crossbred calves from non-Piedmontese females.

TERMINAL CROSS ???

Pay attention to the BW1C epds...

This is shown in POUNDS of birth weight from NON-Piedmontese cows...

All calves will be 1-copy for the inactive myostatin gene and normally have lower birth weight / improved calving ease as compared to 2-copy calves sired by the same bull.

Example: Ear Tag 8145
Lot # 24

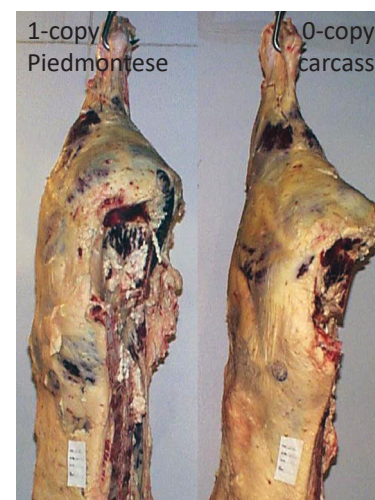

BW epd is 0.4

BW1C epd is -1.1

His 2-copy calves can be expected to average almost 1/2 pound heavier at birth; but his 1-copy calves are expected to be 1.1 pounds lighter at birth.

1-copy calves result in improved carcass YIELD, consistently YG 1 or 2; and can also (especially from British-breed dams) Grade Choice.

All in just one cross-breeding season with Piedmontese 2-copy bulls on your cow herd.

BULL SHIPPING - OPTIONS

Duane Whiting: 304-377-9179 - regular runs

Justin Yoder: 330-904-0914

Justin will personally be at Burwell, NE for the Sale and can haul bulls back towards the "east" (ie. Ohio)

Numerous breeders will be attending with trailers & can help haul your purchases. Ask a sale rep!

Sale Terms & Conditions

Auction Protocol

The ruling from the sale manager is final.

Sale day announcements take precedence over previously printed materials.

All bulls have passed a breeding soundness exam within 60 days of the sale, and have been deemed in good health and structurally sound at the time of sale. All bulls are virgin, and older bulls have negative Trich-test results. All bulls are NAPA registered and DNA-test verified as 2-copy for the Piedmontese myostatin gene. Registration certificates will be ownership-transferred to the buyer.

Payment Terms

IN PERSON Terms are cash / check payable to Burwell Livestock Market.

INTERNET BUYERS Terms are payment is due on Monday, April 28, 2025 by wire transfer to Burwell Livestock Market.

Call Burwell at 308-346-4257 for wire instructions.

Breeding Guarantee

Producer warrants that bulls shall be conveyed with a six (6) month breeding guarantee, from the date of purchase.

Should any bull fourteen (14) months of age or over fail to prove a breeder after being used on females known to be breeders, the matter shall be reported in writing to the seller within six (6) months following the date of purchase or six (6) months after the bull has reached fourteen (14) months of age. The seller will have the right and privilege of six (6) months to prove the bull a breeder.

Buyer agrees to notify the Producer within seven (7) days of the injury of any bull(s) on which the Buyer wishes to make a warranty claim. In such event, Producer covenants and agrees to provide a replacement bull of equal quality or credit towards another bull, upon receipt of written verification from a licensed veterinarian confirming the bull is unsound due to reasons other than negligence or willful misconduct on the part of the Buyer. Producer has the right to request a second veterinary exam, at Producer's sole cost and expense, and shall be entitled to any salvage proceeds. Such credit shall, in any case, be deemed full satisfaction and settlement. In addition, Producer's liability to Buyer is expressly limited to any such credit of the full purchase price paid by Buyer pursuant to this Bill of Sale, and in no circumstances shall Producer be liable for consequential or incidental damages. Such warranties are expressly from Producer to Buyer designated hereto and not to any third parties.

Purchasers Risk

Each animal becomes the risk of the buyer as soon as sold. Buyer will be responsible to reimburse Lone Creek Cattle Company for feed and care from date of sale until the bulls are picked up or delivered.

Terms on Semen Interest

Consigning Producer shall retain a fifty percent (50%) semen interest and the Buyer will receive a fifty percent (50%) semen interest and full possession in bulls sold. Buyer agrees to make bulls reasonably available for semen collection by the Producer, at Producer's sole cost and expense.

Semen Certificate Program (optional)

If the Producer has enrolled, at least 48 hours prior to the sale, a bull into the optional Semen Certificate Program the Producer agrees to provide an unlimited amount of signed semen certificates, free of charge, to the Buyer for as long as he owns the bull for the purpose of registering his own offspring from the bull. For bulls not enrolled prior to purchase, the Buyer may enroll the bull at his sole cost and agrees to provide the Producer an unlimited amount of signed semen certificates, free of charge, to the Buyer for as long as he owns the bull for the purpose of registering his own offspring from the bull. Any bulls enrolled by the Producer in the Semen Certificate Program will be announced prior to selling.

Semen PRE-ORDER Designated Bulls

For bulls that are designated as Semen-Pre-Order Bulls, proceeds from semen pre-orders will go directly to the bull BUYER after the semen has been professionally collected and frozen, with no part of these proceeds shared to the bull producer. Collection and freezing costs are the responsibility of the bull buyer. Payment will be made directly from the semen buyer to the bull buyer, after viable semen has been collected and frozen, but before it is shipped. Shipping cost is the responsibility of the semen buyer. The amount of semen pre-ordered and the dollar amount offered for semen on each bull will be announced before bidding starts on that bull. The buyer of any bull with semen pre-order contracts in place is expected to cooperate with the semen collection project. The buyer of the bull has full possession of the bull and can turn him out with cows whenever is needed. Semen collection will be worked around the bull buyer's breeding season.

Sale Terms & Conditions

General Rules

- Seedstock and commercial quality bulls will be offered for sale by live auction.
- Bulls will be available for viewing on Saturday morning prior to the start of the sale.
- Bidders need to register prior to the start of the sale and will be assigned a unique bidder number.
- **IN PERSON Terms** are cash / check payable to Burwell Livestock Market. **INTERNET BUYERS Terms** are payment is due on April 28, 2025 by wire transfer to Burwell Livestock. Call Burwell at 308-346-4257 for wire instructions.
- All sales are final. All bulls will have passed a breeding soundness exam and are deemed in good health, condition and structural soundness at the time of sale. The Consigning Producer will warranty bulls for 6 months from date of sale for structural soundness (does not cover injury unless veterinary deems injury caused by lack of structural soundness).
- All bulls are NAPA registered, either Fullblood or Naturalean, verified 2-copy for Piedmontese myostatin C313Y, and ownership registration papers will be transferred to the buyer.
- Buyers need not be physically present to bid. **Online bidding options are available via DVAuctions. See below.**

SEMEN PRE-ORDER Option

- An opportunity to “pre-order contract” purchase semen at the special price of \$14/unit on select bulls in the sale; pre-orders must be in increments of 10 units/bull:
- These select bulls will be highlighted in the catalog as “SEMEN BULLS”
- You must be physically present on sale day to take part in the Semen Pre-Order Option; it is a one-day-only special price offering.
- Semen Pre-Order Contracts are available from a NAPA representative, and must be signed and returned to the NAPA sales representative with your selections at least 1 hour PRIOR to the start of the bull sale.
- Proceeds from semen pre-orders will go directly to the bull BUYER after the semen has been collected and frozen. If the bull does not produce freezable quality semen within 12 months of sale date the semen preorder contracts become null and void.
- Collection and freezing costs are the responsibility of the bull buyer (generally runs \$4/straw).
- Payment will be made directly from the semen buyer to the bull buyer, after the semen has been collected and frozen, but before it is shipped. Shipping cost is the responsibility of the semen buyer.
- The amount of semen pre-ordered and the dollar amount offered for semen on each bull will be announced before bidding starts on that bull.
- The bull buyer of any bull with semen pre-order contracts in place is expected to cooperate with the semen collection project.
- The buyer of the bull has full possession of the bull and can turn him out with cows whenever is needed. Semen collection will be worked around the bull buyer’s breeding season.
- The consigning producer (bull breeder) is retaining a 50% semen interest, therefore he is entitled to as much semen as he needs at his cost of collection and freezing. But the consigning producer (bull breeder) is not entitled to any share of semen sale income from the Semen Pre-Order program.

ONLINE BIDDING via DV Auctions: www.dvauction.com

Visit www.dvauction.com and REGISTER at least 48 hours before the sale.

It’s as easy as 1-2-3

- 1) Create an account at www.dvauction.com under the “create new account” tab;
- 2) Apply for bidding by clicking “apply for bidding” in the upper left corner of screen;
- 3) Tune into the sale & make your purchases!

FARM-TO-FORK TRACEABLE

- Raised on family ranches across the Midwest
- Verified birth-to-harvest traceability
- DNA-testing confirms Piedmontese heritage
- 100% source-verified
- Certified by Where Food Comes From Inc., an accredited, independent third party

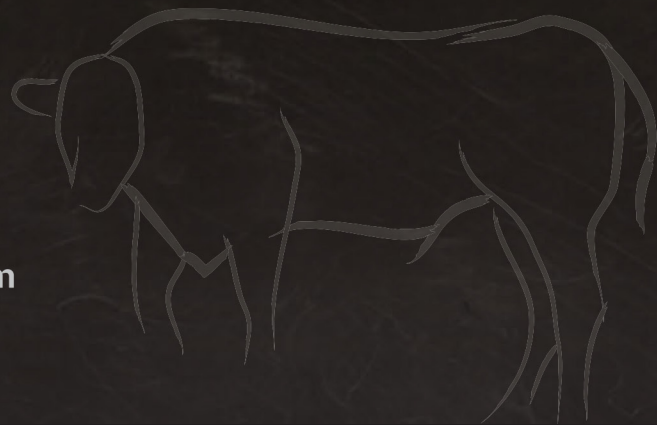

HUMANELY HANDLED

- No added hormones, no antibiotics, no animal by-products
- Cattle spend most of their lives roaming open pastures
- Low-stress handling and humane husbandry at every step
- USDA-certified NHTC (Non-Hormone Treated Cattle)
- BQA (Beef Quality Assurance) certified ranchers

ENVIRONMENTAL STEWARDSHIP

- Hay and feed grains are grown by Certified Piedmontese® ranchers
- Ranches are located on open grasslands and near fresh water
- Ranchers employ responsible grazing practices
- Local processing limits food miles and carbon footprint

Certified Piedmontese
100 West Grand Drive
(800) 414-3487 | www.piedmontese.com

Certified Piedmontese

LEAN, HEART-HEALTHY BEEF

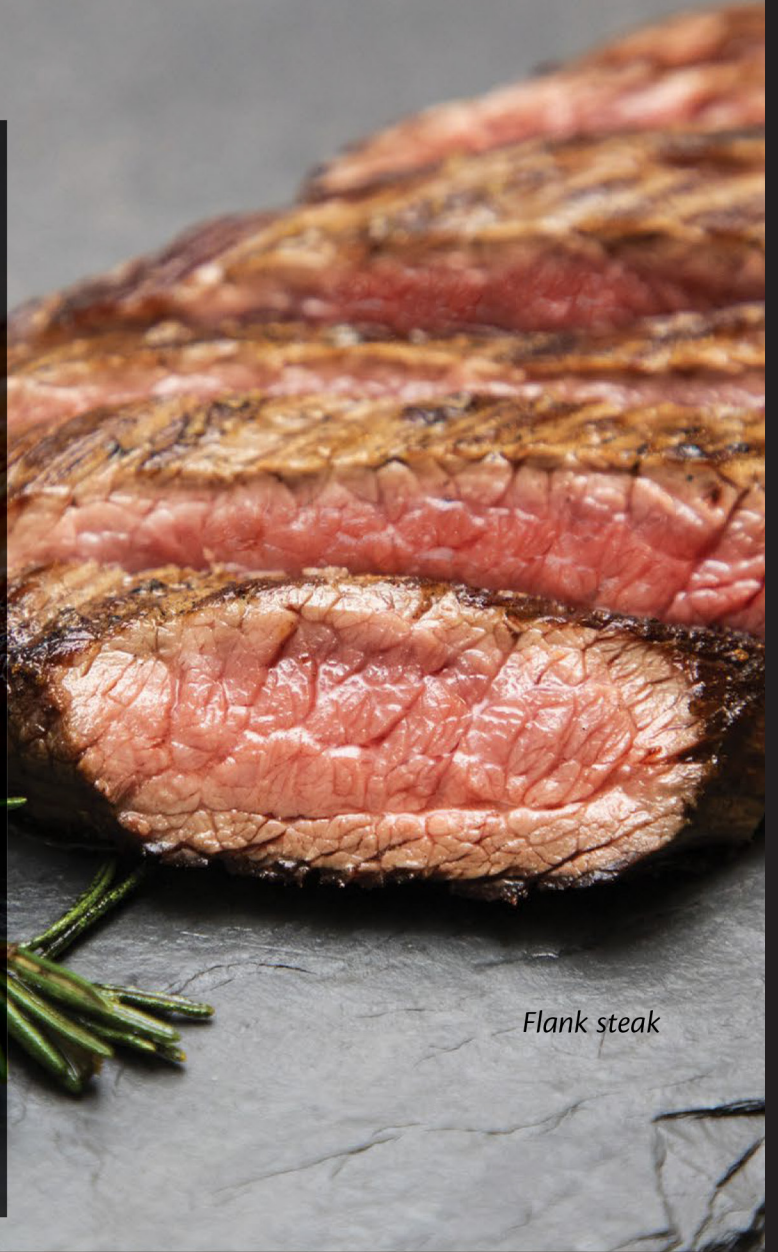

- Low in calories, saturated fat, and total fat
- Excellent source of protein
- Raised without added hormones, steroids, antibiotics, or animal by-products
- Select cuts certified heart-healthy by the American Heart Association

EXTREMELY TENDER

- As tender as Prime-grade beef
- Tenderness proven by USDA scientists
- Tenderness doesn't compromise nutrition or flavor

RARE & UNIQUE

- Piedmontese represent less than 1% of cattle in North America
- Naturally develop around 30% more muscle mass
- Heavy musculature is a natural evolution of the breed

Flank steak

Serving Size: 4 Ounces	Filet Mignon		Ribeye		Sirloin	
	 USDA Prime	USDA Prime	 USDA Prime	USDA Prime	 USDA Prime	USDA Prime
Calories (kcal)	150	224	180	348.5	130	209
Total Fat (g)	4.5	14.5	10	30	3	11.5
Saturated Fat (g)	2	7.5	4.5	14.5	1.5	6
